

# How to Install Microsoft Teams

How to Install Teams through [Software Center](#).

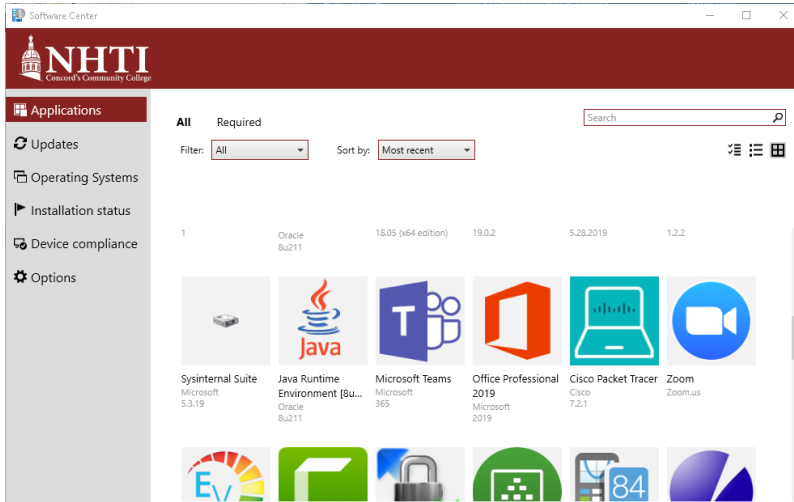

## Notice

To utilize Software Center you must be connected to NHTI's Internal admin network or connected to VPN. If you are not connected to the correct network you will not see all available applications in the menu items.

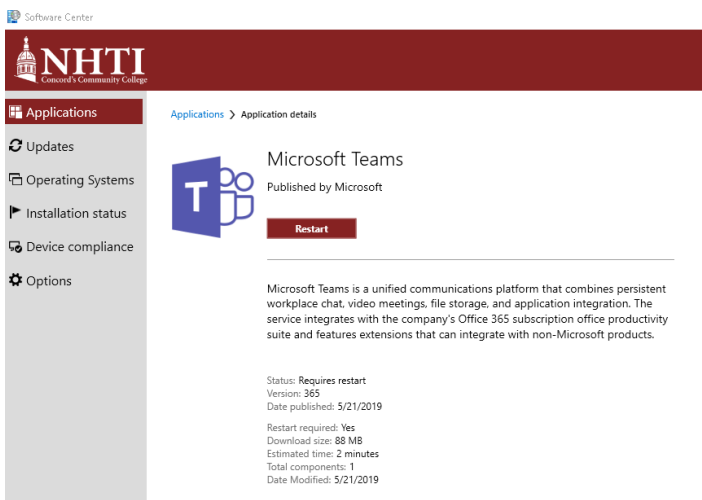

## Step 1:

While in Software Center navigate to the Applications Pane and scroll down until you see the Teams Icon

## Step 2:

Click the Teams Icon and then hit Install. Teams will prompt you to restart your computer
